The island La Palma

She is the most nord-western, second smallest of the volcanic Canarian islands and enchants us with her wide views. You will find green Rain forests, Dramatic Alpine mountains and arid Lava landscapes. The average temperature from November until March is 18 to 22°C and 28 to 30°C in summer. Depending on the Ocean currents it's usually possible to swim in the sea.

The place Encántala

On 360m, midst of a lava field, is the green area of 1.440sqm, protected by a pink wall. Due to its position in the mild valley of Aridane, the views on mountains, sunsets, the ocean and a the cloud-cascade are breathtaking. Several sandy beaches and the biggest city Los Llanos are just about 10 minutes by car or bus. Some hiking tracks start directly from here.

About Fabienne, born 10th of Sept. 1981

Until I relearned to feel, love and be courageous, in community projects, in seminars and by self exploration, I lived feeling dissatisfied and searching for something which was missing.

Since 2016 I have lived out of passion on La Palma. I am an open, playful, practical, pragmatic, tender and sensitive person. I love connecting, closeness, touch, to be, the Encántala-garden, silence, to laugh out loudly, counscious body training, Contact Improvisation, Yoga, to sew, to make music together, to meditate, kids, to dance Lindy Hop, Bachata, Salsa, giving coachings, seminars,...

Still, I want to expand my sense of what is possible and take more place in the world. I stay curious and explore how I can live more happily and relaxed, to be able to give more love into the world :-)

I keep wishing to have a great partnership and my own children :-)))
